

Update account link

The account link expires after 90 days and must be renewed. A notification to this effect will appear on the app's home screen in good time before this happens.

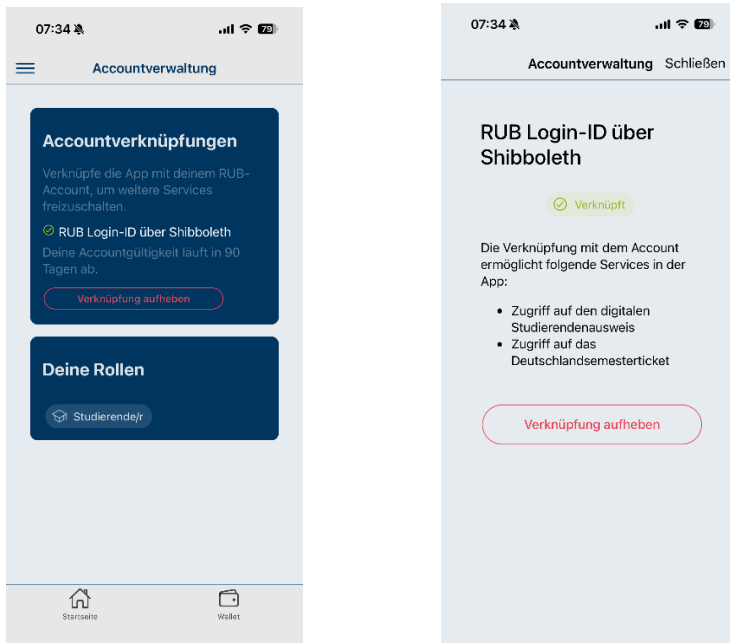

Here's how to proceed (if the link still exists):

Open Account Management

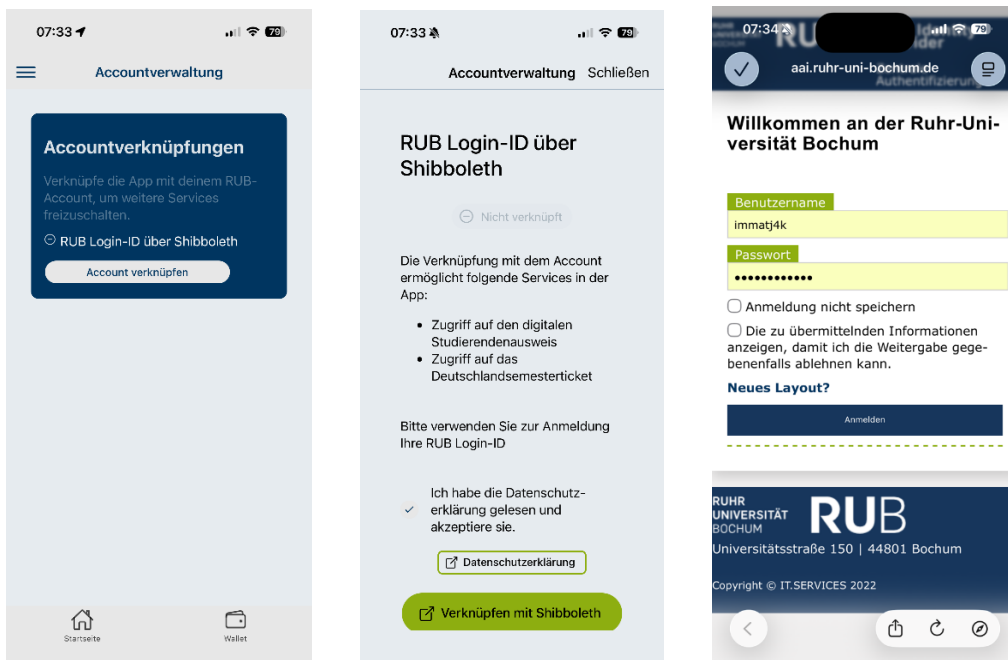

Step 1: Remove the existing link

- Go to Account Management (via the burger menu in the top left-hand corner [three lines])
- Select the 'Unlink' button
- Select the 'Unlink' button

Step 2: Create a new account link

- Select the 'Link account' button

- Tick the box for the privacy policy
- Select the 'Link with Shibboleth' button
- Enter your RubLogin and password in the Shibboleth login screen and click 'Log in'

The account will then be linked again and the assigned role will be displayed.
